BI5, L30, Greenland St., Monteverde
Homes, Gen. Mariano Alvarez, Cavite

// PROFILE

I enjoy creating things. It does not matter what media it might be. I am simply enthusiastic when it comes to tinkering and creating something new. I was that kid who breaks his own toys just to see how it works. This resulted in me learning all sorts of skills in real life. Which includes art, graphic design, and music theory. I've always had a knack for computers and technology. Studying computer science has allowed me to learn new skills such as Java, VB.Net, C#, as well as HTML, CSS, and PHP. And of course, I also have knowledge for Microsoft office suite including Word, Excel, Powerpoint, Publisher, etc. I look forward in finally becoming a professional software developer and grow in this career path.
